

THE PALATKA NEWS

NEW SERIES VOL. XV, NO. 3.

PALATKA, FLORIDA, FRIDAY, JANUARY 18, 1907.

\$1. Per Year.

We Must Have FLOOR SPACE

On which to display the mammoth stock of Spring Clothing which will begin to arrive on February 1st. In order to accomplish this result in the three weeks left us we have decided to let the people have all our

Winter Weight Clothes

at a slight margin above New York Manufacturer's Cost.

This means Stylish, Hand-Tailored, Elegantly Finished Suits of the Most Desirable Fabrics for Everybody.

There isn't a shop worn or shoddy garment in this store.

By reason of this reduction on this season's clothing every man and youth in Putnam County can

Start the Year Right

with a new suit and have the satisfaction of knowing that he is as well dressed as the best of them.

In this store are the Clothes you'll see worn today in big cities by men who know what style is—who set the style. The illustrations show some of the advance models—genuine Schloss or Kirschbaum suits; medium length, semi-formfitting, splendid examples of good taste and good fashion.

They are not too extreme and not too staid; you will find them as good style a year from now as today. They are some among our many attractive Clothes—models for gentlemen. Come in and see them all.

Remember, this sale is no closing out of mostly, shop worn garments of antiquated style, but a sale of

1906-07 Winter Goods.

There will be no band accompaniment with this sale. We are depending alone on the High Quality of the Goods and the real, substantial reduction in Price at which we offer them.

FEARNSIDE CLOTHING COMPANY

Notice of Application for Tax Deed Under Section 8 of Chapter 4888, Laws of Florida.

Notice is hereby given that P. D. Watkins, purchaser of tax certificate No. 103, dated the 4th day of July, A. D. 1904, has filed said certificate in my office, and has made application for tax deed to issue in accordance with law. Said certificate embraces the following described property, situated in Putnam county, Florida, to-wit:

Sec. of sec. 2, section 2, township 9, range 23-40 acres

The said land being assessed at the date of the issuance of such certificate in the name of Est. J. W. McKee. Unless said certificate shall be redeemed according to law, tax deed will issue thereon on the 23rd day of February, A. D. 1907. Witness my official signature and seal this 16th day of January, A. D. 1907.

(Seal) JOSEPH PRICE,
Clerk circuit court Putnam county Fla.

Notice of Application for Tax Deed Under Section 8 of Chapter 4888, Laws of Florida.

Notice is hereby given that J. Hanna, purchaser of tax certificate No. 111, dated the 4th day of July, A. D. 1904, has filed said certificate in my office, and has made application for tax deed to issue in accordance with law. Said certificate embraces the following described property situated in Putnam county, Florida, to-wit:

1 A in Lot 3, of Lot 2 and Pt Lot 6, section 5, township 10, range 27-80 A.

The said land being assessed at the date of the issuance of such certificate in the name of J. N. Roler. Unless said certificate shall be redeemed according to law, tax deed will issue thereon on the 23rd day of February, A. D. 1907.

Witness my official signature and seal this 16th day of January, A. D. 1907.

(Seal) JOSEPH PRICE,
Clerk circuit court Putnam county, Fla.

Notice of Application for Tax Deed Under Section 8 of Chapter 4888, Laws of Florida.

Notice is hereby given that Archy Moody, purchaser of tax certificate No. 103, dated the 4th day of July, A. D. 1904, has filed said certificate in my office, and has made application for tax deed to issue in accordance with law. Said certificate embraces the following described property situated in Putnam county, Florida, to-wit:

Begin 720 ft. from sec. of Sec 15, T. 10, R. 26, east and run N. 640 ft., W. 330 ft., S. 660 ft. and E. 330 ft. to beginning, being a part of sec. of sec. of section 15, township 10, range 26-5 acres

The said land being assessed at the date of the issuance of such certificate in the name of Unknown. Unless said certificate shall be redeemed according to law, tax deed will issue thereon on the 23rd day of February, A. D. 1907.

Witness my official signature and seal this 16th day of January, A. D. 1907.

(Seal) JOSEPH PRICE,
Clerk circuit court Putnam county, Fla.

Notice of Application for Tax Deed Under Section 8 of Chapter 4888, Laws of Florida.

Notice is hereby given that D. S. Cannon, purchaser of tax certificate No. 184, dated the 4th day of July, A. D. 1898, has filed said certificate in my office, and has made application for tax deed to issue in accordance with law. Said certificate embraces the following described property situated in Putnam county, Florida, to-wit:

Pt. 1/2 Sec. 12, Francis, section 8, township 10, range 26

The said land being assessed at the date of the issuance of such certificate in the name of J. J. Padgett. Unless said certificate shall be redeemed according to law, tax deed will issue thereon on the 23rd day of February, A. D. 1907.

Witness my official signature and seal this 16th day of January, A. D. 1907.

FOR RENT.—Two furnished or unfurnished rooms. Inquire corner Oak and Sixth St. 1-4-tf

EARTHQUAKE DISASTER

Visits Kingston, Jamaica, on Tuesday—One Thousand Dead, 90,000 Homeless--

A Ten Million Dollar Loss.

Dispatches from St. Thomas, D. W. I., on Wednesday state that 1,000 persons were killed by the earthquake at Kingston, Jamaica, on Tuesday and that 90,000 persons are homeless. The property loss in the city alone will reach \$10,000,000.

All people have been warned to keep away from Kingston. The death toll is described as awful. There is no fodder for animals and famine is imminent. Money is useless. The banks have been burned but the vaults are supposed to be safe. The misery on all sides is indescribable. Rich and poor alike are homeless. Provisions of all kinds are urgently needed. It is impossible to say where anybody can be found. Sir James Ferguson, vice chairman of the Royal Mail Steamship Company, is among the killed. The loss of life is very great, but the exact numbers are not yet known. The dead are buried under smoldering ruins. The mercantile community suffered most severely, warehouses falling upon them. Many professional men are dead or injured. The negroes are looting. Ghostly scenes are being witnessed. All the shops have been destroyed and all the buildings, in and around Kingston, are in ruins. Very few of them are safe to live in.

Kingston is the capital of the island of Jamaica, and the principal seaport and commercial city of that island. It is situated on the south coast and on the north side of a fine harbor. The latter is a land-locked basin available for the largest ships and is enclosed on the south by a long tongue of land at the extremity of which is Port Royal. The population of Kingston is about 50,000.

The city is laid out with regular wide streets, and the better class of houses are neatly built with wide verandas, and surrounded by hand-some gardens. Street cars run to the suburbs, and two lines of railroad connect the city with the northern and eastern parts of the island. Kingston has a botanical garden, library, museum, hospital and various other public buildings, and is the seat of an Anglican bishopric.

The harbor of Kingston is considered to be one of the finest in the world, and is protected by a strong fort. There is a naval arsenal at Port Royal.

Nearly all the trade of the colony of Jamaica centers at Kingston. Kingston and the commercial houses of that city have extensive relations with southern Cuba and Central America, as well as the United States and Europe. The exports are mainly rum, coffee, dye woods and fruits. The streets of Kingston run at right angles to the sea.

REV. CARLISLE P. B. MARTIN, LL. D.

Of Waverly, Texas, writes: "Of a morning, when first arising, I often find a troublesome cough and phlegm, which produces a cough and is very hard to dislodge; but a small quantity of Ballard's Horehound Syrup will at once dislodge it, and the trouble is over. I know of no medicine that is equal to it, and it is so pleasant to take. I can most cordially recommend it to all persons needing a medicine for throat or lung trouble." Sold by Ackerman-Stewart Drug Co.

Choice of Cow's Milk.

A writer states that where commercial value is the only point at issue a milk must have a high percentage of solids in order to be "good." This is not true, however, where weak digestion is to be dealt with. Skim milk contains nearly all the protein of the whole milk, but after the fat in the cream has been removed the milk loses half its fuel value. What is left, however, has a value equal to that of the whole milk for the building and repair of tissue, for the making of blood and muscle and bone, while it has half the value of the whole milk for supplying heat and muscular power. Buttermilk is practically sour skim milk. Other things being equal, the milk of a cow which gives a large quantity is preferable to that of a cow giving a small quantity. The former is sure to have a rugged constitution, good digestive power, depth of respiration and good physiological traits. A phlegmatic temperament in the animal is desirable.—Medical Record.

Enthusiasm to the End.

An enthusiastic French physician, while dying, made careful observations of his condition, detailing his symptoms to his son and attending physician in order that they might make a record of them. At the very end, when he was on the point of passing away, he surprised the friends at his bedside by saying, "You see I am dying."

Helped Out.

The Father—So you think you can support my daughter? The Sutor—I'm quite sure I can, sir, if you will help us out. The Father—I'll help you out all right, all right! Whereupon the sutor dashed madly down the front steps with the father a close second in the race.—Cleveland Plain Dealer.

A Mistake.

The chairman told me at the meeting that I was out of order. "Well, wasn't he right?" "No, I saw a doctor on the way home, and he told me that I was never in better shape in my life."

CURED LUMBAGO.

A. B. Cannon, (Chicago), writes March 4, 1903. "Having been troubled with Lumbago, at different times and tried one physician after another, then different ointments and liniments, gave it up altogether. So I tried once more, and got a bottle of Ballard's Snow Liniment, which gave me almost instant relief. I can cheerfully recommend it, and will add my name to your list of sufferers." Sold by Ackerman-Stewart Drug Co.

LATE STATE NEWS.

The State Baptist convention is in session at Live Oak.

Dr. D. A. Watts, a leading citizen of Lake City is dead.

Mr. and Mrs. George J. Gould of New York were in Tampa this week.

The state federation of labor is in session at Tampa, but the delegates are not working.

There is a movement on foot in Tampa to extend the limits of that progressive city.

Three men at Mayo are in jail charged with arson, one of whom was the owner of the burned building.

Leading lawyers of the state will meet in Jacksonville February 1st to organize the State Bar association.

Machinist McIntyre of the United States Navy yard was drowned in Pensacola bay on Monday while bathing.

Mullaney the new league baseball manager for Jacksonville is promising that city a pennant winning team this year.

A company has been formed at Madison to build a \$20,000 brick hotel to take the place of the one destroyed by fire 10 days ago.

Robert Thagard of Ocala was bitten by a mad dog at Reddick Sunday evening. He started at once for the Pasteur Institute, Atlanta.

Mrs. Ruby Wilson Trammell and Mr. George Talbot Whitfield, prominent Tallahassee people, were married in that city last Tuesday morning.

Safe blowers dynamited the safe of the L. R. Rhodes Co. at Macclenny last Thursday night and secured \$1,100 in cash and papers to the value of \$1,000 more.

Gov. Broward has called a special election for Levy county on February 28th, to elect a senator for the Twenty-first district to succeed Senator N. R. Carter, deceased.

The public schools of the state will observe Arbor Day, February 1st, and State Superintendent Holloway has come to the aid of teachers in the suggestion of an appropriate program of exercises.

The Masonic grand lodge now in session in Jacksonville has decided to build a new Masonic Temple in that city at a cost of \$125,000. The new building is to be seven stories high.

Chas. Jones, a negro of High Springs, who has been systematically robbing A. C. L. freight cars at that place, was killed while caught in the act by an officer to whom he resisted arrest last Saturday night. Jones' pal was overpowered and arrested.

Capt. C. E. Garner, president of the Jacksonville board of trade has been named by President Roosevelt as one of the commissioners to test and examine the weight and fineness of the coins reserved at the several government mints during the calendar year, 1906.

Gainesville voted on an additional \$10,000 bond issue last Tuesday, but as only seven citizens had qualified by paying their poll tax, the voting was postponed until the 23rd of the month. The bond issue carried by a vote of 69 for to 6 against and 4 improperly marked.

Capt. W. B. Denham will resign as manager of the Georgia, Florida & Alabama R. R. to assume the place of general manager of the Tampa Northern, a new railroad to be built from Tampa to Atlanta. Mr. Denham was formerly superintendent of the old Florida Southern and afterwards of the Atlantic Coast Lines.

Hon. Cromwell Gibbons of Jacksonville has just returned from a six week's visit to Cuba where (in San Spiritus) he has been engaged in a law case involving a suit against the government for \$700,000 for alleged damage to the houses and cattle of a wealthy Cuban during the Cuban-Spanish war. The suit was originally against the Spanish government, a debt assumed by the United States. The case is not yet settled.

It is announced that Judge F. B. Carter of the First Judicial Circuit, Pensacola, will send his resignation to the governor in a few days. It is also announced that J. Emmet Wolfe, private secretary to the governor, will be a candidate for the place. It would not be surprising for Wolfe to have been a candidate for most everything in the shape of an office that has offered during the last five years.

It is writ large in the book of Fate that the time is not far distant when the man of bibulous tendencies in this neck of the wood, who wants to lounge up to the bar and "nominate a pizen," will have to hike out for Pensacola on the west, or Jacksonville on the east, before he can have his wish. Every county between those widely separated extremes is now "dry" except Gadsden, Franklin and Santa Rosa, and in the latter county the prohibition spirit is actively at work. The Milton Star says that a petition is now being prepared to circulate to call a local option election there and the Star is evidently all right to take sides against the open saloon—Live Oak Democrat.

Crecent City Temperature.

The following temperature readings for last week did not reach this office in time for insertion in the Crecent City department, but as many readers preserve these weekly tables the same is published here.

Crecent City temperature for the week ending January 15th, 1907.

January	T. a. m.	p. m.	9 p. m.	24 hrs 24 hrs
5, Saturday	58	75	62 1/2	78
6, Sunday	62	76	61 1/2	77
7, Monday	62	74	61	76
8, Tuesday	59	74	61 1/2	75
9, Wednesday	57	73	61	75
10, Thursday	57	73	61	75
11, Friday	61	75	64 1/2	78

Chamberlain's Colic, Cholera and Diarrhoea Remedy. Buy it now. It may save life.

Suggestions About White Fly.

The Florida Agricultural Experiment Station has issued the following bulletin, written by Dr. E. W. Berger of the Department of Entomology:

The exceptionally low temperature at Christmas time of 1906 has resulted in a partial or complete defoliation of citrus trees in some northern sections of Florida, and this fact again brings up questions of whitely control under such circumstances.

In trees and groves where the friendly Fungi (the Red, Yellow and Brown) parasitic upon the whitely are found in abundance, it is advised to collect large quantities of the dead leaves still clinging to the trees, or fallen leaves, with plenty of fungus upon them. These should be dried and stored, since the fungus may be useful for again starting it in the trees and groves next spring. Methods for introducing the fungi by spraying the spores suspended in water on the leaves of trees infested with whitely, or by pinning on leaves, have been developed (see Bulletin 88, now in press). The fungi when dried have been found to retain their vitality for two months and further observations may extend this time. Should the reason for the fungus collected prove untrue by the time that they are required, little labor will have been lost. Specimens sent to the station at the proper time will be gladly tested for their vitality.

During December, January and February there are probably but few if any unatched eggs or adults of the whitely; all are in the young scale-like stages and live attached to the under surface of the leaves. They are easily killed by spraying while in these stages, provided, of course, that the spray comes in contact with them. Drying the leaves will kill them, hence all the young insects upon leaves dropped by freezing will die, with the possible exception of those nearly matured. For the latter reason all dead and dropped leaves should be destroyed, plowed under or burned, excepting those wanted for the fungi on them.

Now, in view of the fact that freezing has begun the work of defoliating, it appears desirable to complete it, or to take advantage of the reduced number of leaves and spray with the determination to kill every remaining whitely larva upon the tree; even going to the extent of using a spray sufficiently strong to complete the defoliation. One drastically thorough spraying at any time is better than several less thorough ones. Spraying, furthermore, cannot be made effective unless all co-operate. If but few green leaves remain upon a tree it is advised to complete the defoliation by trimming. If, to complete defoliation, spraying is adopted, this should be done at once before the new buds start.

While in the above the writer has emphasized spraying, yet he does not for a moment desire to leave the impression that he is an unqualified supporter of spraying for the whitely. On the contrary, he considers spraying only in the light of an expedient, a makeshift, and firmly believes that the solution of the whitely problem is closely connected with whatever success we can achieve in devising sure and ready methods for introducing the fungi and other parasites. In other words, the solution of the fungus problem will be the solution of the whitely problem, and it is believed that the solution of each is at hand. The reader is again referred to Bulletin 88, which will be ready for distribution in a few days.

For more complete spraying directions see Bulletin 76 of this Station. It is also pertinent to the subject in hand to emphasize the necessity for destroying all unnecessary breeding places of the whitely. Under this head belong the following trees: Cape jessamine, privet, hedges, all useless and abandoned citrus, chinaberry and umbrellas, trees, viburnum, laurel, and the mock orange (cherry laurel) when infested. Of these the cape jessamine must be defoliated, but the work must be complete. All the others should be cut down and burned. During summer these trees are such prolific breeding places for the whitely that the latter becomes scattered far and wide.

State University Notes.

Professor P. H. Rolfs director of the Experiment Station has come over from Lake City and established his headquarters at the University. Several men of the station staff have already come and the rest will soon follow.

Professor L. D. Scott of the University of New Mexico has arrived to take the place of head of department of Animal Husbandry in the Experiment Station made vacant by the resignation of Professor C. M. Conner, now of the University of North Carolina.

Professor Schmidt and Hechstrasser have moved into the new houses just opposite the University campus. The approach to the University from the city of Gainesville is becoming all that could be desired. The city has paved the streets, constructing a walk alongside of this road which it hopes to pave with granite when the necessary funds are provided.

The examinations for the Rhodes Scholarships will be held at the University Jan. 17-18 under the direction of Professor I. N. Anderson. The gas machine which has remained at Lake City awaiting the removal of the Experiment Station is now being installed and all scientific departments will soon be provided with gas which will greatly facilitate their work.

Sacred Concert at Pomona.

In place of the regular service at Pilgrim Congregational church, Pomona, next Sunday evening, there will be a sacred concert, consisting of both vocal and instrumental numbers. In addition to the local talent there will be musicians from abroad to take part in the program. Everyone is cordially invited.
